## HORSE & HOUND PODCASTS

Do you have a spare 40 mins in the car, or need something new to listen to whilst mucking out.... why not try the new Horse and Hound Podcasts?

You are probably wondering why we are promoting the podcasts? Well, not only do they provide you with up-to-date news and advice they may also feature a familiar voice!!

Ricky was excited to accept the offer to record a few podcasts on veterinary topics. Each podcast requires around an hours additional research, trying to make the information given as concise and current as possible. The team at Horse and Hound have been fantastic to work with and another session is looming for future episodes. So keep an eye out for updates on more podcats being released. \* Click Here\* to follow the link to Horse and Hound Podcast webpage..... Happy listening!

### VETERINARY CALM +

Do you need a 'Calmer' just take the edge off your horse? Still want to be able to compete? Why not try our Veterinary Calmer +

Veterinary Calm + is designed to be fed to aid in the maintenance of normal nervous function. This supplement supplies generous levels of L-Tryptophan and Mag- nesium, with the addition of the live yeast *Saccharomyces Cerevisiae*.

## LASER SURGERY FOR SARCOIDS

Last month we had another successful day of Laser removals of those 'dreaded' sarcoids. With the colder weather and fewer flies around (making post-surgery mangement easier) it is an ideal time of year to think about being proactive. Quick, simple and carried out on the yard, Laser removal has a less than 10% recurrence rate in comparison to other treatments and can be used to remove: sarcoids, melanomas and other skin masses.

If you have concerns regarding sarcoids or would like further information on this treatment contact the Practice on 01442 851921 to discuss the treatments available.
