OCTOBER 2021

## EQUINE HERPES VACCINE (EHV)

Equine Herpes Viruses, commonly referred to as EHV, are a group of viruses which can cause a contagious disease in horses. We can't always see it, but EHV is still present and is a highly contagious airborne disease. When did your horse last have their EHV vaccination? If it was 6 months ago (or more), NOW is the time to book their next vaccination.

Vaccination can shorten the duration of the virus in infected horses, help limit the spread and reduce future outbreaks. See below, the details for the vaccination course.

If you would like further information on EHV please contact the office.

### EHV VACCINATION COURSE

Vaccination against EHV is a central recommendation of the disease control strategy. Let's not risk another outbreak – contact the practice for more information on starting your horse's vaccination course.

- 1st vaccination
- 2nd vaccination- 4-6 weeks after 1st vaccine
- Boosters - 6 monthly from date of 2nd vaccine, then ongoing from previous date

## VIRTUAL CLIENT EVENING 6TH OCTOBER 7.30PM

After the success of our first client evening we are pleased to announce that we will be holding another FREE webinar.

Managing respiratory health in the winter.

Wednesday 6th October @7.30pm

We look forward to you joining us on the evening!

You are invited to our **virtual client event**

**Farr & Pursey**  
Equine Veterinary Services

Join the vets at the practice to find out all you need to know about **keeping your horse's respiratory system healthy this winter**, all from the comfort of your own home.

- ✓ How to identify the signs and causes of respiratory disease
- ✓ How to improve your horse's respiratory health and performance
- ✓ Opportunity to ask your vets all your questions

**Wednesday 6th October 2021 at 7.30pm**

It is easy to join, simply register your details by following the link below and you will be sent an email to join on the night.
