MARCH 2025

## WELCOME TO THE TEAM: GEORGINA

We are thrilled to introduce the newest permanent member of the team, Georgina Llewellyn BVSc (Dist.) BSc MRCVS.

Some of you may have had the pleasure of already meeting Georgina as she had been carrying out our out of hours visits alongside our team since July 2024.

Georgina carries out all aspects of 1st opinion work and is looking forward to meeting all of our fantastic clients and their beloved horses.

## SLEIP® GAIT ANALYSIS

Objective gait analysis using an App?

Every step tells a story and yes, this 'story' can now be easily reviewed on a new App called Sleip®.

Alongside to the Equinosis® Lameness Locator, we have recently added a new diagnostic component to assist with gait analysis and lameness assessments. The Sleip® App uses artificial intelligence to track over 100 anatomical key-points on the moving horse, quantifying gait asymmetry and detecting even small irregularities.

Most of us are familiar with the complex of the lameness puzzle and therefore, Sleip® can now be used to provide objective evidence based data and increase clinical precision. By using an app, a horse's gait and movement pattern can be recorded, analysed and monitored. That means that even subtle irregularities that can be undetected by the human eye, can now be detected early, preventing minor problems from developing into chronic conditions.

More information can be found at: <https://sleip.com/>

## NOW AVAILABLE

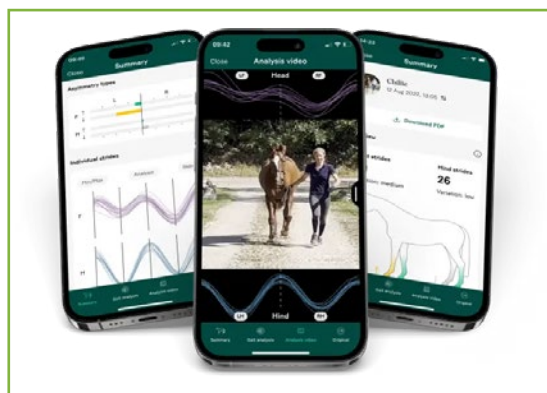

All of the vets at Farr and Pursey Equine have this tool available to them on every visit. It takes less than 2 minutes to take the videos and as long as there is mobile / data reception your analysis can be done within minutes. We can then also share the findings with you – sending you a report at the same time, all for the cost of £21.60!

## DON'T FORGET OUR ONLINE SHOP

The site for all your horse's needs
