Your Horse, Your Choice

## SLEIP® GAIT ANALYSIS

We have been using SLEIP as a practice for a little while now, and are using AI-powered lameness detection system to adjust how we assess your horse's movement.

What makes SLEIP special? Well, using just a smartphone, it analyses over 100 anatomical key points during movement, and detects subtle irregularities that the human eye might miss. Providing scientifically-validated measurements, it's a stress-free way to check your horse.

It takes less than 2 minutes to take the videos and as long as there is mobile / data reception your analysis can be done within minutes. We can then also share the findings with you – sending you a report at the same time!

### THIS TECHNOLOGY ALLOWS US TO:

- Catch potential lameness issues earlier
- Provide you with clear, quantifiable data
- Track your horse's progress during treatment
- Make more precise diagnostic decisions

If you have any questions about SLEIP or want to schedule a lameness evaluation, please contact the office.

## A VERY SAD FAREWELL TO GEORGINA

Earlier this month we had to say a very sad farewell to our vet Georgina. Due to personal reasons, Georgina has headed back to her home of New Zealand. Georgina has brought so much light, joy and energy into the F&P family and we have loved having her as a part of our team.

Although we will all miss her dearly, we wish her all the best for the future.
