PRACTICE UPDATES

Welcome, Karen!

We are delighted to introduce the newest member of our administration team, Karen, who joined the practice in July.

Karen is working alongside Laura and Luca in our practice office. Some of you may already have had the pleasure of speaking with her and will know what a wonderful addition she has been to our fantastic team.

We look forward to many more of you getting to know Karen. Whether you're calling the practice or visiting us in person, you'll be greeted by her warm, friendly manner and her readiness to assist with any enquiries.

NEW DIAGNOSTIC IN-HOUSE TESTING:

We are excited to announce the expansion of our in-house diagnostic testing services with the addition of the Enalees Epona® Equine testing platform.

Using advanced Loop-mediated Isothermal Amplification (LAMP) technology, we can now provide rapid, in-house molecular diagnostic testing for a range of important equine respiratory and bacterial infections, including:

- Strangles
- Equine Influenza
- Equine Herpesvirus (EHV)

By offering fast, accurate PCR-quality molecular diagnostics in-house, we can deliver same day results, enabling earlier diagnosis, prompt treatment decisions, and improved management. This enhanced testing capability supports better clinical outcomes while helping to reduce waiting times for both veterinary professionals and horse owners.

For more information about our new in-house testing services please contact the office.
